

GIS Managed Services Consultant, Wellington

Eagle Technology is the distributor of the world's leading Geographic Information Systems (GIS) software products and services. With a large team of experienced GIS professionals in New Zealand, we deliver enterprise geospatial information solutions to organisations in both public and private sectors across New Zealand.

The primary responsibility of the GIS Managed Services Consultant is to support and manage administration activity of a customer's enterprise GIS system. This includes platform monitoring, incident management, data automation (ETL) and the implementation of ArcGIS Enterprise software and its supporting components.

Candidates will have experience with working within a cloud environment (AWS and Azure) and deploying and administering an ArcGIS Enterprise platform. They will also be familiar with scripting languages and techniques (PowerShell, Python and FME) and have good problem-solving skills.

This role will sit within our growing Managed Services team to manage GIS cloud solutions and designs that provide value to a diverse range of customers.

If you are interested in exploring this opportunity in more depth, please email your CV, contact details, availability (for both interview and job commencement) and an indication of your salary expectations to : jane_crawford@eagle.co.nz

All applications will be treated in utmost confidence.
