> "ArcGIS Utility Network is configurable for any utility with linear assets. Esri solutions explore the world of electric, gas, and water utilities."

> "Today's modern utility worker can access sophisticated information systems from their mobile devices, for seamless integration with the Utility Network."
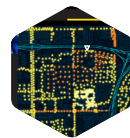

Utility Advantage
PROGRAMME

The Eagle Technology and Geographic Business Solutions (GBS) **Utility Advantage Programme** is an alliance to deliver the Esri ArcGIS Utility Network solution to New Zealand Utilities.

Eagle's GIS Professional Services team and GBS are each Esri-recognised Utility Network Experts and together they have developed the **Utility Advantage Programme** specifically for New Zealand Utilities to support a smooth and strategic investment in the Utility Network.

With a need to maintain and deliver better information to customers, regulators, and employees, change is sweeping the utility industry, with Information systems required that can deliver higher performance, more elaborate detail, and greater scalability. The ArcGIS Utility Network provides a new foundation for utility GIS solutions to meet these unique challenges.

Eagle Technology (the official distributor for Esri in New Zealand and the South Pacific) and GBS (Esri Gold Partner) are the gold-standard team of professionals most qualified to deliver on your Utility business needs.

Network Modelling

Greater Detail | Digital twin of physical assets
Enhanced Connectivity | Digital as-built
Structural Attachments | Life Cycle Management

Network Visualisation & Analytics

Built-in Schematics | Expanded Tracing 3-D
Subnetworks | Rule-Based Validation
Operational Awareness

Network Sharing

Cross-platform Support | Simplified Enterprise
Data Maintenance | Common Understanding
of the Network | Derived information solutions
Services-Based Architecture

Why choose UAP?

Utility Network Readiness | Three Stage Pilot
Data Migration and deployment | Extended
Support and GIS as a Service | The programme
is delivered through packaged professional
services.
